Services and more

About Us

ReDiscover's Women and Children program provides intensive outpatient and residential substance use and mental health services to women.

This comprehensive and compassionate program focuses on assisting women on their road to recovery. We believe addiction is a mental health issue that impacts many facets of a person's life, so we use an "entire person" treatment approach that addresses emotional, physical, social, environmental, vocational, and spiritual needs. We work to not only help clients with their emergent challenges, but to validate the person as a whole.

Our services are person- and family-centered, trauma-informed, and focused on long-term recovery and personal transformation.

Our Services

- Individual, group, & family counseling
- Group education
- Nursing and psychiatric services
- Case management services
- Employment specialist services
- Full-service daycare for children while their parent gets treatment.

ReDiscover's Women and Children Program serves Missouri residents and accepts Medicaid, Medicare, private insurance, and self-pay clients. Individuals in need of financial assistance and out-of-state residents with private insurance are able to seek services.

Program Goals

Our goal is to assist women in their recovery process and help them build a foundation for a healthier life. We work to get clients access to housing, legal assistance, and physical and mental health services. We help participants engage in the workforce and/or pursue furthering their education in an effort for each client to have a positive plan of independence and stability.
